

Your Complete Guide to Getting Dry with THE fischer

Patient Starter Guide

RA FISCHER CO.

Meet THE fischer

The Fischer is an FDA-cleared, at-home iontophoresis device that treats excessive sweating (hyperhidrosis) of the hands, feet, and underarms. Unlike traditional devices, it uses advanced silicon-graphite electrodes that are non-metal, corrosion-free, and safe for long-term use. The Fischer also stands apart by offering both Direct and Pulsed Current options, giving patients the flexibility to choose between faster, more consistent results or gentler, more comfortable treatments.

Another major advantage: The Fischer's trays are large enough to treat both hands or both feet at the same time, effectively cutting your treatment time in half compared to devices that only allow treatment of one hand/foot at a time.

With hospital-grade performance in a home-use format, The Fischer is ideal for patients seeking non-invasive, drug-free relief from sweat.

With hospital-grade performance in a home-use format, The Fischer is the best option for patients seeking non-invasive, drug-free relief from sweat.

How It Works

The Fischer uses a simple but powerful combination:

Tap Water

Contains natural minerals like calcium and magnesium.

Mild Electrical Current

Delivered via Direct or Pulsed current.

Mineral Infusion

Current drives minerals into the sweat glands, temporarily blocking them.

Consistency

Regular treatment leads to long-term dryness

No chemicals. No injections.

Just tap water and technology.

SAMPLE TREATMENT SCHEDULE

Week	Frequency	Session Time
1 - 2	Daily	15-20 minutes
3 - 4	Every other day	15 minutes
5+	Weekly/as needed	15 minutes

Results typically begin within the first 1-2 weeks.

What's Included With Your Device

Each Fischer system comes with:

- Main control unit
- Storage bag
- Power cord
- User manual
- White electrode cords

Accessories depend on your selected bundle:

- **Hands & Feet Bundle:** large silicone-graphite electrodes, pH-balancing foam inserts, trays for hands and feet
- **Underarm Bundle:** Underarm electrodes with sleeves
- **3-in-1 Bundle:** All accessories

Insurance & Prescription Guide

Yes, The Fischer is often covered by insurance!

Prescription Required: As an FDA-cleared device, a prescription is required for The Fischer iontophoresis device. You can ask your provider for one, or we can refer you to one of our partner telemedicine providers.

We Help With Insurance: Our team guides you through paperwork, claims, and eligibility. We can file claims on your behalf or help you get reimbursed directly from your insurance provider.

Accepted Providers: Aetna, Cigna, Blue Cross Blue Shield, UnitedHealthcare, and more.

We make the process simple so you can focus on treatment.

Why The Fischer Stands Out

When it comes to treating hyperhidrosis, The Fischer offers unmatched comfort, safety, and long-term value:

FDA-Cleared, Hospital-Grade: Designed for home use with the performance of a medical facility.

Non-metal Electrodes: Silicon-graphite technology means no corrosion, no replacement costs, and no risk of metal ion exposure.

Dual Current Options Both Direct and Pulsed Currents for customizable comfort and faster results.

All-In-One Flexibility: Treats hands, feet, and underarms depending on the bundle you choose.

Real-Time Visual Feedback: Monitor treatment progress through a user-friendly interface.

Compared to other devices, The Fischer delivers more consistent results, fewer side effects, and longer-lasting dryness.

What Patients Are Saying

My hands used to drip down my wrists onto my forearms - that's how sweaty my hands would get. I've used this machine everyday for a month now, and my life is changed! I can shake hands, hold and write on paper, my confidence is back. I can't recommend this enough. It changed my life.

- SARAH C.

via Trustpilot

I can remember the countless pairs of shoes that were destroyed by my slippery feet and the countless sheets of paper that either folded onto itself and/or ripped due to my sweaty hands. My RA Fischer iontophoresis machine has truly changed my life! I can fully live my life without consciously and subconsciously thinking about my excessive sweating!

- CRYSTAL

via Trustpilot

The sweating in my hands completely stopped after the third week of treatment and the sweating in my feet has decreased almost to the point of no sweating. This treatment has completely changed my life. Now, I feel much more secure when shaking hands, going for a manicure/pedicure and wearing sandals. This has been the only treatment that has worked for me. In the past, I have done botox, creams, antihistamine medicines, etc. and nothing has worked. I will forever be grateful to the RA Fischer team!

- MILAYT T.
